

Can you help an abused dog?

There is a dog in _____ . Her name is _____ (_____) she lives in a garage (a cold one) in a crate filled with bugs feces and her blood as she is not spayed. She was a small white poodle, but she is no longer white. She is not allowed in the house and is sometimes tied to the back door to cry as she hears coyotes. She is not fed properly and is only fed the food the family disposes of in the garbage, mostly rice. Her feces is like brown water.

She is very sick little love and the family is _____ and they will not listen to anyone. And the neighbor he fears to report this family _____ is dying and the SPCA will not check it out as she is okay in a dirty crate in a cold garage. Hopefully you have the resources to check out this little sweetheart.

She does not deserve to die this slow & lonely death. She lives at _____ and sometimes the children take her out after school!

Thanks!
